

Breckenridge Golf Course Clubhouse Addition & Remodel

Breckenridge, Colorado

Town of Breckenridge

Baker-Hogan-Houx

Project Information

This Project consisted of the construction of 5,500 square feet addition and 10,000 square feet of a complete remodel to the existing Clubhouse. Construction included underground golf cart storage, new pro shop, full restaurant, bar, and a completely new kitchen. Work also included the construction of two restroom outbuildings, one lightning shelter building, and a new starter pavilion.

Special Features

Finishes included custom mill work, custom tile, granite counter tops, and installation of a new interior floor to ceiling stone fireplace. TCD began construction in October after the golf season ended. TCD completed the project in seven months working through the winter to meet the owner's scheduled opening day on Memorial Day weekend. Special shoring at wetland was required during construction.
